About me

Committed developer with experience in financial services and customer support, focused on applying and expanding my technical skills in web development while contributing to the success of the team and the company through effective communication and relationship management.

I am seeking an innovative and collaborative environment that fosters continuous learning, values transparency, teamwork, and the development of technological solutions with a positive impact.

Technical skills

AWS | GCP | Nginx | Bootstrap | Tailwind | CSS3 | Sass | HTML5 | JS | Node.js | express | MongoDB | MySQL | React | Next.Js | Vite | macOs | Linux | Windows | Git | GitHub | Figma | Firebase | Java | Spring Boot

Soft skills

Excellent communication | Adaptability | Teamwork | Analytical thinking | Attention to detail | Creativity | Results-oriented

Academic Project

3D-Garden – Fullstack Developer (Certification Project)   February 2025 – Present

E-commerce platform for customized 3D-printed plant pots.

- Backend Development: Built a RESTful API using Java and Spring Boot, following best design practices to ensure scalability and efficient maintenance.
- Frontend Development: Developed responsive interfaces using JavaScript, HTML, and Bootstrap, ensuring an optimal user experience across devices.
- SQL Database: Designed and managed a MySQL database, optimizing queries and relationships for efficient performance.
- Agile Methodology: Collaborated in an agile team, using SCRUM methodologies to ensure fast and efficient deliveries.

Professional Experience

KODEMIA - Fullstack Developer   January 2024 - January 2025

FAIREFAC: Web platform for managing the purchase and sale of vehicle parts.

- Backend Development: Built a RESTful API using Node.js and Express, following a layered architecture to ensure scalability and maintainability.
- Authentication and Security: Implemented JWT for user authentication and encrypted passwords using Bcrypt.
- External Service Integrations: Integrated AWS S3 for file storage, geoNames API for geolocation, and Nodemailer for email sending.
- Payment Gateway: Integrated Stripe to handle secure payments, enhancing the overall user experience.
- NoSQL Database: Designed and managed a MongoDB database, using Mongoose for model handling and relationships.
- Frontend Development: Built responsive interfaces and reusable components with Next.js.
- Agile Methodology: Collaborated in an agile team using SCRUM to ensure fast and efficient deliveries.

AVIS – Bilingual Sales Agent   October 2022 - February 2025

- Provided personalized customer service for vehicle rentals, ensuring a satisfactory experience and resolving inquiries in both English and Spanish.
- Managed contracts, vehicle fleet, and upselling, optimizing processes to improve operational efficiency.
- Executed direct sales of packages and complementary services, consistently exceeding established metrics and KPIs.
- Maintained a proactive approach in identifying sales opportunities and fostering customer loyalty.

Education
